PROFILE

Highly skilled Java Developer with 3+ years of experience in building and maintaining robust, high-performance applications. Expertise in Java SE/EE, Spring Boot, and Hibernate for developing RESTful APIs and microservices. Experienced in database programming with SQL and Oracle, and utilizing tools like Maven, Git, and JUnit to ensure code quality and efficient development processes. Adept at full-stack development and passionate about optimizing code and solving complex technical challenges.

EDUCATION

IIT Patna (masai school)   04/2025 – Present
Product management with agentic AI   Online

Poornima Group of Institutiions   2017 – 2021
B.tech   Jaipur

PROFESSIONAL EXPERIENCE

Kistechno softwares   10/2023 – present
Software Engineer   Jaipur
Responsible for designing, developing, and maintaining full-stack web applications using Java (Spring Boot) and React.js, ensuring seamless user experience, scalability, and optimized performance.
Implemented core application logic and functionality with Java on the backend and React on the frontend, handling REST API development, state management, and feature enhancements to deliver robust, responsive interfaces.

TCS   2022 – 2023
System Engineer   Bangalore
Worked as a Java Developer on a banking domain project at Morgan Stanley, focusing on building and enhancing backend services.

Developed and maintained RESTful APIs using Java, Spring Boot, and Microservices architecture, ensuring scalability, performance, and security compliance.

Implemented end-to-end web services integration, including request/response handling, exception management, and API documentation.

CERTIFICATES

Unity essential(Game development beginner to advanced) 🔗
April 2024 - March 2025

SKILLS

Programming language
Java, C/C++, JavaScript, Html/css, python

Tools IDE
VS Code, Intellij, Android studio

Framework/ Library
Spring boot, react.js, node.js

Architecture/ concepts
Microservices

Database
Mysql, oracle

PROJECTS

Vehicle insurance system 🔗
Java, spring boot, database
Vehicle insurance system with database connectivity. 🔗

Data visualization 🔗
Java, data
Java Data Visualization project designed to make histogramming, plotting, and fitting accessible for Java users.
